

Qualified Technical Person (QTP) Course:

UEENEEG122A Conduct Compliance Inspection of LV Electrical Installations Single Phase and with demand exceeding 100A Per Phase:

UEENEEG123A A Conduct compliance inspection of LV electrical installations with demand exceeding 100 A per phase

UEENEEG197A Apply currency of safe working practices and compliance verification of electrical installations:

UEENEEG122A Conduct Compliance Inspection of LV Electrical Installations Single Phase and with demand exceeding 100A Per Phase:

UEENEEG123A A Conduct compliance inspection of LV electrical installations with demand exceeding 100 A per phase

This is an accredited course. These units are part of the package for QTP nominees who must hold a current Queensland electrical mechanic work licence and must have completed, within the last three years;

- UEENEEG197A - Apply currency of safe working practices and compliance verification of electrical installations
- UEENEEG122A - Conduct Compliance inspection of single phase LV electrical installations,
AND

- UEENEEG123A – Conduct compliance inspection of LV electrical installations with demand exceeding 100 A per phase

Day 1: UEENEEG122A Conduct compliance inspection of single phase LV electrical installations

This unit covers inspection of single phase domestic installations for demand not exceeding 100 A for varying compliance with electrical safety regulations. It encompasses working safely, conducting tests and inspections, documenting non-compliance defects, taking/recommending actions resulting from non-compliance defects, applying regulatory requirements and completing inspection reports.

Enterprise customer relations protocols encompassing:

- Purpose of customer relations
- Procedures for dealing with customers
- Dealing with customer issues

Electricity regulatory safety requirements encompassing:

- Regulatory requirements for ensuring the safety and integrity of electrical installations.

Regulatory requirements are relative to the jurisdiction for which competency is sought

- Types and scope of electrical inspections and safety audits
- Authority of electrical inspectors

Electrical installations, single phase inspections encompassing:

- Scope of inspection of single phase installations.
- Processes for inspection of single supply arrangements, main switchboard and earthing

- Actions and procedures for dealing with non-compliance defects.

Day 2: UEENEEG123A Conduct compliance inspection of LV electrical installations with demand exceeding 100 A per phase

This unit covers inspection of general electrical installations for verifying compliance with electrical safety regulations. It encompasses working safely, conducting tests and inspections, documenting non-compliance defects, taking/recommending actions resulting from non-compliance defects, applying regulatory requirements and completing inspection reports.

Electrical installations, inspections and safety compliance audits of multiphase LV electrical installations with demand exceeding 100 A per phase encompassing:

Inspection types and their scope:

- inspection of general electrical installations, special electrical installations, hazardous areas installations, safety audits and investigations.
- Inspection procedures
- Processes for confirming that performance standards have been met.
- Actions and procedures for dealing with non-compliance defect

Students will also need to complete an assignment before attending college.

Duration: 2 Days; 7:30am to 4.00pm

Locations: Electrogroup, 9 Railway Terrace, Rocklea, Brisbane QLD 4106

Registration: Complete enrolment form

Electrical Contractors Licence Enrolment Form

Course Fee:

\$305 If you are eligible for CSQ Funding (CSQ will fund \$685)

\$990 Full Fee - If you are NOT Eligible for Funding

Fee is calculated through a Construction Skills Queensland (CSQ) funded subsidy of \$685. Conditions apply to eligible applicants. Go to <http://www.csq.org.au/search/courses?id=49&v=72> for more information on eligibility requirements

Students will receive a 'Certificate of Attainment' after successful completion of this course

For the separate course on UEENEEG197A - Apply currency of safe working practices and compliance verification of electrical installations, refer to the information below.

UEENEEG197A Apply currency of safe working practices and compliance verification of electrical installations:

This unit covers current practices in working safely and verifying compliance of electrical installations that affect the currency of competencies held as well as an overview of the Queensland Electrical Safety Act and Regulations. It encompasses working safely, procedures for rescue from contact with live parts and for applying emergency first aid. It also encompasses current practices in visual inspections and mandatory compliance testing,

identifying non-compliance defects and mandatory reporting requirements.

Pre-Requisites:

Competency in this unit can only be gained by persons who hold a current 'Unrestricted Electrician's Licence' issued in an Australian State or Territory.

Students will also need to complete a pre-reading.

Course Duration:

One day Course

Course Dates:
